Investment Philosophy

Makaseb Income Fund (MIF) primarily seeks to provide current income along with the stability of capital. Fund's secondary objective is to seek income growth over the long term. The Fund aims to achieve its investment objective by investing in a diversified portfolio of fixed and floating rate investments originating from countries in the GCC, MENA, South Asia and other emerging economies.

Investment Guidelines

(a) Investment in a single GCC country capped at 50% (b) Investment in a single country in MENA/South Asia capped at 50% (c) Total investment in other emerging economies capped at 20% (d) Investment in instruments issued by a single issuer capped at 20% (e) Investment in sub investment grade instruments capped at 75% (f) Investment in non rated instruments capped at 25%.

Overview and Outlook

In what has been a volatile month, the fund increased a further 5 basis points (0.05%) over the month of February. With more economic data confirming a US slowdown and fears over the sustainability of China's economic growth, the latter half of this month has been an unstable period for global security markets. This month performance can largely be attributed to our ICICI and Kuwait Projects securities. Having received a major injection of funds over the past month we have made a number of strategic investments in view of the increased instability in security markets. We now believe the fund is well placed to achieve positive returns both from accrued interest owing to us and further price appreciation.

Issued on March 07, 2007
